

Chris Bross, Chief Technology Officer, DriveSavers Data Recovery

BIOGRAPHY

Chris Bross is Chief Technology Officer at DriveSavers, the worldwide leader in secure data recovery. Since joining DriveSavers in 1995, Bross has engineered his way around physical trauma, mechanical damage and encryption issues to recover data on all types of failed storage devices. Today he manages the R&D team for solid state devices and emerging storage technologies, and guides the development of new tools and technology designed to overcome unique challenges and recover critical data.
