

**Gleb Budman, Co-founder and CEO, Backblaze, Inc.**

**TITLE**

**Tips and Tricks on How to Store 100+ Petabytes of Data**

**ABSTRACT**

Capturing high-resolution content requires mass amount of storage. Learn tips and tricks about how to store massive amounts of data from a company that stores over 100 petabytes worth.

**BIOGRAPHY**

Gleb Budman is CEO and co-founder of Backblaze, a leading cloud storage service that automatically backs up unlimited data for \$5 per month per computer. Backblaze stores over 150 petabytes of data and has recovered over 10 billion files. Gleb bootstrapped Backblaze to millions in revenue and profitability. Previously, Gleb led the product teams from pre-funding through acquisition at Kendara and MailFrontier, and founded three prior companies. He received his MBA from Berkeley's Haas School, has been a speaker at events including GigaOm Structure, Massive Storage Systems and Technology, and SNIA; profiled by Inc. and Forbes; and holds 5 patents on security.
