

Phoebe Henson, Systems Engineer, Human Space Advanced Development Group, Honeywell Aerospace

BIOGRAPHY

Phoebe Henson is a Systems Engineer at Honeywell Aerospace in their Human Space Advanced Development group. As part of her work, she has supported the NASA Orion spacecraft, the first human-rated spacecraft designed to reach Mars, and worked on research and development projects developing technologies for Deep Space Human Habitats on Mars and in Space Vehicles.

Phoebe is a recent graduate from Arizona State University where she received a B.S.E. in Electrical Engineering.
