

Irshad Raihan, director of product marketing, Red Hat

TITLE

Container Native Storage for the Hybrid Cloud

ABSTRACT

Containers and hybrid cloud are impacting the way enterprise storage is consumed. The line between storage and applications has blurred. Storage must adapt. Hear from Red Hat about how close we are to the vision of storage as a service - where storage is deployed, managed, and scaled like an application.

BIOGRAPHY

Irshad runs the worldwide product marketing team at the Red Hat Storage business unit. Previously, he held senior product marketing and product management positions at HP and IBM covering big data and data management products. Irshad holds a Masters in Computer Science from Clemson University, and an MBA from Carnegie Mellon University. He is based in Northern California and can be reached on Twitter @irshadraihan.
